

ILS or LOC RWY 1L
HARRY REID INTL (LAS)

MISSED APPROACH: Climb to 3000 then climbing right turn to 7000 direct BLD VORTAC and hold, continue climb-in-hold to 7000.

The diagram shows a 4-qubit system. The first qubit is a control qubit, represented by a circle with a dot and the label A_4 . The second qubit is a target qubit, represented by a circle with a dot and the label A_4 . The third and fourth qubits are also represented by circles with dots, but they are not labeled. The control qubit is connected to the target qubit by a horizontal line, and the target qubit is connected to the third and fourth qubits by horizontal lines.

VGSI and ILS glidepath not coincident (VGSI Angle 3.40/TCH 63).
